

Genesis 12/11/2020

1:1 Focused movement in Original Will manifests the reciprocal creation. Original Expanded consciousness Manifests the vessel. Original reciprocal conscious Will's vessel manifests the Vessel of evolving humanity's Origin moving to fulfillment.

Focused 𐤂 (2) movement 𐤇 (200) Original 𐤎 (1) will 𐤗 (300) manifest 𐤕 (10) reciprocal 𐤈 (400) create 𐤎 𐤇 𐤂 (203) Original 𐤎 (1) expansion 𐤆 (30) consciousness 𐤈 (5) manifest 𐤕 (10) vessel 𐤄 (40)
Original 𐤎 (1) reciprocal 𐤈 (400) consciousness 𐤈 (5) will 𐤗 (300) Vessel 𐤄 (40) manifest 𐤕 (10)
Vessel 𐤄 (40) evolve 𐤀 (6) humanity 𐤈 𐤈 𐤎 (406) Original 𐤎 (1) movement 𐤇 (200) fulfillment 𐤕 (90)

Focused movement in Original Will manifests the reciprocal creation. The Original Expanded consciousness manifests as the reciprocal vessel. As the Origin's consciousness is reciprocal so is the vessel manifested. Vessel is the womb of humanity's origin moving to fulfillment

Something must be presupposed. There must be recognition of something beyond anything we can comprehend. The assumed presupposition here is all encompassing consciousness. We are becoming increasingly aware of the complexity of the universe, the complex interactions in the human brain, the reciprocal interactions of all life and life giving forces. This could not come by accident. There is an underlying pattern, an organically growing pattern, of which we are a holographic internal representation,

“My brain is only a receiver, in the Universe there is a core from which we obtain knowledge, strength and inspiration. I have not penetrated into the secrets of this core, but I know that it exists.”
— Nikola Tesla

It is only through consciousness, either sub or super or waking consciousness, that we comprehend and interact with any thing. The form this consciousness takes, as we approach that ever fluctuating border between comprehension and incomprehension, is a torus.

Original Expanded consciousness Manifests the vessel.

Elohim: Original 𐤎 (1) expanding 𐤆 (30) consciousness 𐤈 (5) manifest 𐤕 (10) vessel 𐤄 (40)

Original (1) expanding (30) consciousness (5) manifests (10) vessel (40) is Elohim, the first God name in Genesis. Writing the name clockwise around a circle then starting with the Lamad and going counter-clockwise around a circle gives us Pi 3.1415. Aligning this name with the circle gives it a feminine connotation as well as the primary concept of form, womb etc. 'Eloh' is a feminine form; 'im' is a masculine plurality. The resulting balance of masculine and feminine fertilizes and creates.

The diameter of the tube aspect of the torus is “focus (2)”. The tube is creation, that which has been established by Original Will as conducive to evolving humanity. The diameter of the over all sphere is “expansion (30)” or the blossoming outward from the center.

Torus

Original Will moves. It's movement corresponds to it's nature, which is to focus (beth=2). This develops a pattern of a torus which is the expansion (lamad=30) of a focused concept.(2). This dimensional reality is the vessel. The **Volume** of this torus is the fulfillment of perceived fragment: *perceived 𐤎 𐤈(6) fragment 𐤕 𐤇(290)*. H'Aretz = Hologram = 296

Torus volume = 2 x pi squared x Radius of the torus x radius of the tube squared.

= 2 x(3.1415x3.1415) x15x(1x1)= 296 The volume of the Torus 296 (H'Aretz).

Duality

Manifest ' (10) vessel's ם (40) Original ם (1) reciprocal ן (400) sans zeros is 1414 or 1.414 which is the square root of 2. Consider a square that is 1.414 on each side. Each side represents the '*manifest vessel's original reciprocal*'. One side is on that singular dimension of unification or of potentiality, of chaos, any way you would like to see it. The 90 degree angular side is the focusing of this into another dimension. The relationship of the potential to the focused application, the diagonal between the two sides, is 2. The reciprocal applied to a new dimension produces duality, hence space, sequence, vessel.

The Original Will, through movement, manifests the reciprocal creation. This consciousness expands as the vessel of our existence. We, as the holographic extension of the Original, are fulfilled within the vessel. Original Will manifests humanity based on perception.

Definitions

d'Olivet gives Beth the meaning of: paternal, virile, interior and active action. The Lexicon says it means: at, in, abide, stay, in the presence of, the same, expresses the quality or manner in which a thing shows itself, together with, the value of. So 'focus' refers to the action of returning to the interior.

Heh is defined by d'Olivet as : universal life, breath, air, spirit, soul, that which is animating, vivifying. Heh becomes 'consciousness'

d'Olivet defines Mem as: woman, another, productive, creative, maternal exterior and passive action, local, collective developing the being in infinitive space, as far as its nature permits or uniting by abstraction in one single being all those of the same kind. I feel comfortable recognizing both the generalized 'Vessel' and specifically 'Universe' as wombs of humanity. Time, Space, individual separation are all mental constructs. When all 'individuals' act as a single unit, (which happens a lot more often then you may think), then the 'laws' of nature are established or strengthened. Both 'humanity' and 'individual' are not restricted to two legged mammals. They refer to any focal point of individualized consciousness from an amoeba to an Archangel; from a speck of dust to the Universe.

1:2 Evolving Holographic existence synergizes reciprocal conscious evolution. Evolving focused potential evolves vitally willed seed of expression expanding thought. Individual manifesting the reciprocal potential vessel evolves movement. Evolving vital Elohim's vessel moves vital thought reciprocating Primal speech of conscious receptivity.

Evolving ם (6) Hologram ם ן ם ן (296) existence ' ן (15) synergistic ן ן (405) reciprocal ן (400) conscious ן (5) evolve ם (6) evolve ם (6) Focused ם (2) potential ם ן (11) evolve ם (6) vital ן (8) Will ם (300) seed ם (20) expression ם (70) expansion ם (30) thought ם (80) Individual ן (50) manifest ' (10) reciprocal ן (400) potential ם ן (11) vessel ם (40) evolve ם (6) movement ן (200) evolve ם (6) vital ן (8) Original Expanding consciousness Manifests vessel (Elohim) ם ' ן ם ן (86) vessel ם (40) movement ן (200) vital ן (8) thought ם (80) reciprocal ן (400) Primal ם ם (100) speech ' ן ן (140) consciousness ן (5) receptivity ם ' ם (90)

Hologram (H'aretz or perception's fragment) reveals the synergistic process of the conscious Original. In order for Original Will's seed to become vitalized, imbued with life, the potential must be focused, or brought deep in the Self. The nature of individual thought comes directly from the nature of expression

The movement of the vessel vitalizes the Creator Gods. Movement (frequency), as the vital thought, the reciprocal Primal speech of conscious Receptivity

Coalescence

Think of a torus; expansion, contraction, expansion, contraction. Expansion (30) contraction (2) = 32 = the Coalescence $\square \uparrow \square \cdot \square \aleph$ (Passionate Eternally Evolving Consciousness) the flux, the wave, the Primum Mobil that defines vibration of sound. Physicality exists because we are built to reciprocate with a certain range of vibrations. It is physical to us because we are capable of interacting with it. Notice that in the first sentence you have, in order $\aleph \square$ (Perceived $\cdot \square$ existence $\uparrow \square$ potential). The Coalescence, only inverted as if it were the primary concept of Coalescence rather than the expressed one. Note as well that the last two pairs are separated by ‘synergistic reciprocal ’

Torus of Coalescence (32) volume = $2 \times \pi \text{ squared} \times \text{Radius of the torus} \times \text{radius of the tube squared}$.
 $= 2 \times (3.1415 \times 3.1415) \times 16 \times (1 \times 1) = 315.8$

thought \square (80) speech $\cdot \uparrow \square$ (140) consciousness \square (5) receptivity $\square \cdot \square$ (90) = 315

$80 + 140 + 5 + 90 = 315 = \text{thought's speech of consciousness receptivity}$

Note that the first two words are separated by: “reciprocal Primal” So, in effect, it reads “Thought, reciprocating the Primal, is the speech of consciousness receptivity. Or, thought, as the act of reciprocating Primal (100) or mutually interacting with the Original as far as we are able, is the speech of the receptivity of consciousness. Anyone that has ever Invoked can attest to the power of speech.

Inferring that, by taking the potential of “*perceived existence potential*” and focusing (2) it in the moving torus structure of “*thought's speech of conscious receptivity*” you achieve the Coalescence of “*Passionate Eternally Evolving Consciousness*” By perceiving the potential, thinking receptively of your self, which is the hologram of the Whole, you achieve Coalescence - “*Passionate Eternally Evolving Consciousness*.”

In this process is the initiation of unique individuality, first in sympathetic consciousness ‘*synergistic reciprocating*’ and then with the Original “*reciprocal Primal*”.

Vitality

Vital means absolutely necessary or important; essential; or full of energy; lively. I use it in the second sense as in lively or full of life or full of the essence of living. For instance potential is just possibility until it is focused then it becomes vitalized. An idea is just an idea until it is embraced then it can change a life. The series of events described in Genesis is not necessarily a long time ago, the Original Will did this then that happened then . . . All of the events described happen now on any scale whatever – Universal, personal, imaginative. All of this is not subject to time or space or object. It is the Pattern.

1:3 Evolving manifest Origin extends Elohim's manifestation. Conscious manifest Origin evolves the movement of birth's consciously manifested fire.

evolve \uparrow (6) manifest \cdot (10) Origin \aleph (1) extend $\neg \square$ (240) Elohim $\square \cdot \square \neg \aleph$ (86) manifest \cdot (10)
conscious \square (5) manifest \cdot (10) Origin \aleph (1) evolve \uparrow (6) movement \neg (200) birth $\cdot \uparrow$ (16)
consciousness \square (5) manifest \cdot (10) fire $\neg \uparrow \aleph$ (207)

Original extends into manifestation through Elohim (Original Expanded consciousness manifesting the vessel) manifested consciousness manifests (fractalizing) The Original's birth of consciously manifest fire.

Elohim is : *Original Expanded consciousness manifesting the vessel*. The value of its letters reduce to 5 and 5 is 'consciousness '. We, as focused members of the one Consciousness, bring the Will of the Original into the duality realm of conscious. Elohim is the balance of masculine energy (expansion) and feminine energy (form). It is the form of going within balanced with expansion. Visualize the torus form, always moving, always augmenting itself, being the basic form of both consciousness and matter.

Fractal

Assuming consciousness (5) as the primary state, the extension of this into an applied level would be to square 5. $5 \times 5 = 25$. 25 is manifested ' (10) conscious \aleph (5) manifesting ' (10) or to fractalize inside the hologram.

Elohim \aleph ' \aleph \aleph \aleph (86) expressing it inside the parameter of 1 would be 0.86

When applied to the fractal formula of $z_n = z_n \text{ sqrd} + c (n+1)$; where z is the original state of Elohim, n is the 5th depth of level of the fractal and c is the 'manifested consciousness manifests.' (0.025)

C is the focus of Elohim that is being fractalized. Here it is the process of fractalization itself. *Manifest consciousness manifesting*.

Then the square root would be 0.217 which is the state of: consciously \aleph (5th level) manifested fire \aleph \aleph \aleph (0.217).

Exothermic fire is a process or reaction that releases energy from the system to its surroundings; releasing the potential from the primary matter and giving it expression in the sensory plain. So birth is not so much a reproduction of an individual but an evoking of the individual's internal nature into the surrounding reality.

Kether

This is the first of the \aleph \aleph \aleph ' \aleph statements and distinguishes Kether in the series of the Sepheroth. This series of letters is translated 'and said' in the regular translation. With 'God' afterward it is read 'and said God'. The next time this series of letters appear they are translated as 'birthing transformation' (the first occurrence in the text it is translated letter by letter, thereafter it forms a word). Kether is here defined as the *birth of conscious fire*.

1:4 Birthing light, Elohim's humanity is the fiery seed of manifest reunification. Evolved focused birth focuses abundance, expanding Elohim. Focused manifest Individual's conscious fire evolves the discerning conscious Soul.

birth ' \aleph (16) light \aleph \aleph (201) Elohim \aleph ' \aleph \aleph \aleph (86) humanity \aleph \aleph \aleph (406) fire \aleph \aleph \aleph (207) seed \aleph (20) manifest ' (10) reunify \aleph (9) evolve \aleph (6) Focus \aleph (2) birth ' \aleph (16) Focused \aleph (2) Abundance \aleph (4) expanding \aleph (30) Elohim \aleph ' \aleph \aleph \aleph (86) Focused \aleph (2) manifest ' (10) individual \aleph (50) conscious \aleph (5) fire \aleph \aleph \aleph (207) evolve \aleph (6) discern \aleph ' \aleph \aleph (62) conscious \aleph (5) soul (vital Will's seed) (328)

Evolving manifested light, Elohim's humanity is the fiery seed of reunification. Evolved focus evolves manifestation which focuses abundance expanding Elohim. Focused manifest Individual's conscious fire evolves the discerning conscious Soul.

Vs 2: Evolving Hologram exists as the synergetic reciprocal of conscious evolution. The hologram is the intimate interaction all Mind. The original singularity from our perspective is H'Artz. *perceived* $\aleph(6)$ fragment $\aleph(290)$. This, through our eyes, creates a duality: the perceiver and that which is perceived. The movement takes an in and out flow, a torus structure, which creates frequency. Frequency is how often a wave makes a complete cycle. Waves are that with which we interact to see and hear and feel. Our senses access a very narrow band in the full range of possible waves and new senses develop to access a wider range. If we are one with the original consciousness then why are we separate from it? Why have senses to perceive something we are part of anyway? To feel it, to experience and know it minutely. To be the microscope of One knowing the One.

Vs 3: Conscious manifest Origin evolves movement, birthing consciously manifested fire. Consciousness manifests the Origin evolving into movement which evolves fire. Fire is a process that releases energy from the fractal to its surroundings. We take from our deepest Knowing, our connection with the One and release this Knowing into the surroundings, the torus.

Vs 4: Birthing light, Elohim's humanity is the fiery seed of manifest reunification. Light is just that band of frequency that our eyes are aligned to, photons specifically. They have just the right properties to bounce off surfaces and hit our eyes and cause a reaction in the retina and then more reactions that end up in our brains.

R. A. Schwaller de Lubicz in Temple of Man explains it from an Egyptian perspective:

The constitution of the eye shows that the "fire" of light must be neutralized by the watery nature of the aqueous humor and the vitreous body, the Amunian aspect of life. . . . If this reaction did not occur, the phenomenon of light would never exist for the intellectual optical center of the brain. Functionally, this complete process constitutes the "eye of Ra" the reactive emanation from the retina is the true light. The electromagnetic vibration, or the photons, are the impulsive activity, the active mechanical energy, and the light that we see is the reactive vital energy. The physical and chemical effect of the light only exists through some similar reactive phenomena, but these effects are only visible (to the eye) after this vital genesis. It is thus that the sun, the eye of Ra (and not Aten, the solar disk) emanates an invisible light that nourishes the world; this invisible light – the luminous vital energy – makes possible our intelligence of the active, visible light, our knowledge of the light. This concerns the esotericism of the symbol of the eye. To these explanations is added the symbol of genesis represented by the eye and in which, as in all generation, the amniotic crystalline lens takes part. The myth says that it is from the tears of Ra, the salty Water evoked by solar Fire, that human beings were created.

Evolved focused birth focuses abundance, expanding Elohim Evolving focus ($6+2=8$); births ($6+10=16$); Focused abundance ($2+4=6$) = $8+16+6=30$ = expansion $\aleph(30)$.

Light is the vehicle of discernment. Light allows us to see what is us and what is not us. What we want to interact with and what we don't. As we interact with what we honestly identify with, we reunify the aspect of the Original that is Us. I identify with an aspect and you identify with another aspect.

Everyone is a unique and indispensable aspect of the Original. But we need to bring it together, reunify it. That's our job. That's why we are here. It's up to us to save 'God', not the other way around. When we accept our responsibility the world will be a much better place.

Soul

Soul (cheth, shin, koph) was translated as darkness in the standard translation. d'Olivet has the root words meaning: (cheth, shin) violent, disordered, inner ardour seeking to extend, central fire, avaricious, covetous, arid. (shin, koph) return to itself, envelopment, exterior repose, consciousness, an onion, contemplation, profound meditation, speculation, physical sleep, shrouding. The lexicon has the word meaning: piece of wood in the mouth preventing the goat from sucking, wife, prohibited men, withhold, keep back speechlessness, dark, grow dim, obscuration, secret, hiding-place. All of these could refer to the soul. People want to see the soul as some shining light leading you up to heaven. It is, in fact, that hunger that uses the luminosity of sensory interaction and the fire of transformation to follow the path home. It's longing drives you forward. Hunger is the primary human condition because the Soul always hungers to return home. It's tenacious, it seeks to extend, it's the central fire, it's certainly shrouded and it gets in the way when you're contemplating doing something that maybe you shouldn't. It's something with which to contend, to come to terms with. She is not an easy mistress. She'll let you know how she stands if you are aware of her at all. Before we can let her carry us up the Tree we need to change this dark Binah Vessel into the fair Netzach virgin by accepting her nurture and tenacious will. She knows the path and will not fail to lead us back up the tree.

1:5 Birthing formed light, Elohim expands fire. Manifestation evolves the vessel's evolving expansion. The Soul designates expanded manifest purpose birthing Existence. Expression moves Focus, birthing Existence. Focused form moves the concept of origin's vital abundance.

birth י (16) form פ (100) light א (201) Elohim א (86) expanding א (30) fire א (207) manifest י (10) evolve א (6) vessel א (40) becoming א (6) expanding א (30) soul א (328) designate א (301) expanding א (30) manifest י (10) Purpose א (35) birth י (16) Existence י (15) expression א (70) movement א (200) Focused א (2) birth י (16) Existence י (15) Focused א (2) form פ (100) movement א (200) concept א (56) Origin א (1) vital א (8) Abundance א (4)

Birthing formed light, Elohim expands fire. Manifestation evolves the vessel's evolving expansion. The Soul that designates expands manifest purpose birthing Existence. expression moves Focused birthing Existence. Focused form moves the concept of origin's vital abundance.

The result of the exothermic operation produces the Vessel, form, nourishment. The Soul designates that which conforms to its deepest hunger, the return home. When the self, the fractal, responds and interacts with the Soul's designated needs, focuses on it then it moves the concept of origin's vital abundance.

This can be applied personally or universally. Consciousness creates abundance in potential, in expansion, in life. One here depicts the One Whole, the undivided in which all things are possible, you just have to think them.

1:6 Birthing the transformation of Elohim's Fractal movement forms manifest expression focused. This reciprocal evolves the seed of the Macrocosm. Accumulated Evolution of the Fractal vessel blossoms the focused Particular as receptivity's expanding receptivity.

Birthing the transformation of Elohim's Fractal movement of form manifests expression focused. This reciprocal evolved the seed of the Macrocosm. Accumulated Evolution of the Fractaled vessel blossoms the focused particular producing receptivity's expanding receptivity.

Fractal

A fractal is a complicated pattern in mathematics built from simple repeated shapes that are reduced in size every time they are repeated: $z_n = z_n \text{ sqrd} + c (n+1)$

In this verse are two fractals of Elohim.

The first is *expression's focused reciprocal* (472). This results on the 4th level square root as 0.4554. The *macrocosm* (45) is the 4th level of development in the direction of the reciprocal of focused expression (frequency).

Z_n (elohim's 4th level square root manifesting as the *macrocosm* (0.45)) = $z_n \text{ sqrd}$ (elohims (0.86) third level extended into a new dimension) + c (focusing on the aspect of the *reciprocal of focused expression* (0.0472)) (n+1) moving to the next level.

The second fractal defined here is *vessel's blossoming of the focused Particular* (138).

Z_n (elohim's 6th level square root manifesting as *expanded receptivity* (0.120)) = $z_n \text{ sqrd}$ (elohims (0.86) 5th level extended into a new dimension) + c (focusing on the aspect of the *vessel's blossoming of the focused Particular* (0.0138)) (n+1) moving to the next level.

Chokmah

Chokmah is the second Sepheroth. Fire was formed in Kether and the Macrocosm is formed here by moving Fractal. D'Olivet defined this combination of letters י ה י as "every luminous manifestation, everything intelligible." And he defines מ ה as "universalized life, the vital power of the Mother."

1:7 Birth of the expressed will of Elohim's humanity is the alembic birth of blossoming focused particular consciousness. Receptive volition moves the vessel's reciprocal elements. Reciprocal expanding alembic evolves discerning flexible adjustment of the vessel. Primal expanding alembic evolves the fractal seed of the individual.

So far we have seen the process of fractalization. A concept extends into another dimension, qualified by another concept to achieve another level of the beginning concept. The beginning concept in all these fractalizations has been *Elohim, Original Expanding Consciousness Manifests the vessel*. Now a new process is introduced, the *Alembic, the rarefying receptacle*.

Zn (*elohim's* 4th level square root manifesting as the *individual* (0.50)) = zn sqrd (*elohims* (0.86) third level extended into a new dimension) + c (focusing on the aspect of the *particular consciousness*(0.065)) (n+1) moving to the next level.

Zn (*alembic's* 3th level square root manifesting as *seed* (0.020)) = zn sqrd (*alembic's* (0.380) second level extended into a new dimension) + c (focusing on the aspect of the *expressed will* (0.0370)) (n+1) moving to the next level.

An alembic is a vessel used in alchemy that uses fire and water to draw the essence, in the form of oil, out of a herb or resin. It uses fire to heat the water to a boiling point. The water, in its rarefied form of steam, intermingles with the herb and draws out its oil, then moves into a tube where it cools and the water and oil separate. The water is, in effect, receiving the herb's primal essence. *Primal* ל (100) is the Original נ (1) on another level. It is the one that is resident in the infinite particulars that is not affected by the duality process of fractalization.
